

# Spring Term 2021, Amethyst Class

A belated happy New Year to you all. Well, here we are, back in a lock-down situation. It's not what any of us wanted but I'm sure we can make the most of it and provide the best support we can to all the children. This term is our Sciences term where we will be looking in depth at rocks, soils and fossils. I shall endeavour to make this as interactive as possible so that the children get the hands on experience which they would have had if they were here in class.

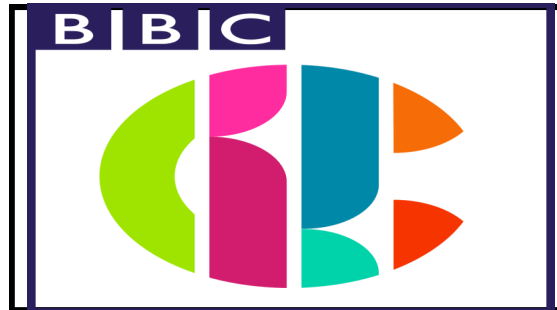

Please follow us on Twitter for regular photographs and updates from our exciting work in class. Look for us under [@daniel\\_gravil](#)  
[Winchelsea Year Three](#)

All the best for the next few weeks and I'd like to thank you for your continuing support.

Mr Gravil, Mrs Harris

## What will I need to do?

I will email out the daily remote learning tasks each morning, between 850 -920. Please check your email each day—if you do not receive anything then contact me on my school email:  
[stdg001@winchelsea.lincs.sch.uk](mailto:stdg001@winchelsea.lincs.sch.uk)

CBBC will be broadcasting three hours of educational content each day, please look at the listings. I will forward any links which I believe compliment the work which we will be carrying out in class and with you at home.

Please make sure we have up to date contact details for you.

## What will I be learning?

**Literacy**-This term we will focus on the specific use of words which improve the effectiveness of our sentences. The children will also look at a range of texts such as; poetry, information texts and traditional narrative stories.

**Maths** - we will begin by looking at the inverse operation and then look at problem solving. A little later this term the children will look at units of measure connected to time.

**Science** - 'Rocks, Fossils and Soils'
