WINCHELSEA PRIMARY SCHOOL
RUSKINGTON

DRUGS EDUCATION PROTOCOL

Part 1: Introduction

At Winchelsea Primary School we regard drugs education as a whole-school issue and believe that opportunities to teach about the importance of living a healthy lifestyle occur throughout the curriculum. We follow the guidelines provided by the LEA, receive advice and support from the Local Health Authority and use resources/materials recommended by the Health Authority and/or the LEA. Lessons that focus on drugs education form part of a sequence of lessons that are designed to promote in children a healthy lifestyle.

Part 2: Aims and objectives

- 2.1** We aim to equip children with the knowledge, understanding and skills that enable them to make the sort of choices that lead to a healthy lifestyle. Our drugs education programme has the primary objective of helping children to become more confident and responsible young people. We teach children about the dangers to health posed by drug taking and aim to equip them with the social skills that enable them to make informed moral and social decisions in relation to drugs in society.
- 2.2** The objectives of our drugs education programme are:-
- To provide children with knowledge and information about illegal drugs and the harmful effects they can have on people's lives;
 - To enable children to discuss moral questions related to drug taking, and so provide a safe environment for young people to share their thoughts and ideas;
 - To help children become more self-confident so that they are able to make sensible and informed decisions about their lives;
 - To let children know what they should do if they come across drugs, or are aware of other people misusing drugs;
 - To help children respect their own bodies and, in so doing, reduce the likelihood that they will be persuaded to become involved in drug abuse;
 - To show that taking illegal drugs is a moral issue, and that choices about drugs are moral choices;
 - To ensure that all children are taught about drugs in a consistent manner, following guidelines that have been agreed by parents, governors and staff.

Part 3: Organisation

- 3.1** Each class teacher answers questions about drugs sensitively and appropriately, as they occur. We encourage children to discuss issues that are important to them and help them to be aware of the dangers of the misuse of drugs. For example, if a child raises the issue of smoking, the teacher takes time to discuss its harmful effects with the whole class. In science lessons we teach children what a drug is and how drugs are used in medicine. We also teach them the difference between legal and illegal drugs.
- 3.2** Drugs education is an important part of our school's personal, social and health education (PSHE) curriculum. The main teaching about drugs takes place in Year 6, where the children are taught about illegal drugs and the dangers involved to those who take them. Lessons that focus on drug education form part of a sequence of lessons that are designed to promote in children a healthy lifestyle.
- 3.3** The children's class teacher teaches them drugs education in normal lesson time. Sometimes the class teacher seeks support from the school nurse or another health professional. The teaching style that we use encourages children to ask questions and reflect on the dangers to health of drug misuse. Children explore issues, such as why people take drugs and how they can avoid putting themselves

in danger in the future. We give children the opportunity to talk in groups or to the whole class. We encourage them to listen to the views of others and ask them to explore why drugs are such a problem for society.

Part 4: Roles and responsibilities

Head teacher

- 4.1** It is the responsibility of the Head teacher to ensure that staff and parents are informed about this drugs education protocol and that it is implemented effectively. It is also the Head teacher's role to ensure that staff are given sufficient training, so that they can teach effectively and handle any difficult issues with sensitivity.
- 4.2** The Head teacher will liaise with external agencies regarding the school drugs education programme and ensure that all adults who work with children on these issues are aware of the school protocols and work within this framework.
- 4.3** The Head teacher will monitor the school's work in this area and report to governors, when requested, on its effectiveness.

Governors

- 4.4** The governing body has the responsibility of setting down these general guidelines on drugs education. The governors will support the Head teacher in following these guidelines. Governors will inform and consult with parents about the drugs education protocol. Governors will also liaise with the LEA and health organisations so that the school's protocol is in line with the best advice available.

Parents

- 4.5** The school is well aware that the primary role in children's drugs education lies with parents. We wish to build a positive and supporting relationship with the parents of children at our school through mutual understanding, trust and co-operation. In promoting this objective we will:-
- Inform parents about the school drugs education protocols and practice;
 - Invite parents to view the materials used to teach drugs education in our school;
 - Answer any questions parents may have about the drugs education their child receives in school;
 - Take seriously any issue which parents raise with teachers or governors about the school's work or the arrangements for drugs education in the school;
 - Encourage parents to be involved in reviewing the school's protocols and making modifications to it as necessary;
 - Inform parents about the best practice known with regard to drugs education so that the parents can support the key messages being given to children at school.

Part 5: Monitoring and review

The governing board will monitor the drugs education protocols regularly and will discuss their findings and recommendations if there appears to be any need for modification. The governing board will take into serious consideration any representation from parents about the drugs education programme and comments will be recorded.
